Currency : USD

Condition of bank expenses: share

If you have any questions concerning payment or related matters please feel free to contact our account-ing department at e-mail: accounts@jvl.dk

RMA terms

Please read terms carefully. Please take note of the minimum investigation and test fee for products outside warranty.

Repair, investigation and test Costs:

For products outside warranty or if no faults found there is a minimum charge for investigation and testing. For motor/controller/driver 1 hour (120EUR) and for modules ½ hour (60EUR). DHL freight will also be added if outside warranty repair.

We will repair and return if repair cost is below 40% of new 1 pcs selling price. If repair cost is above 40% will additional repair cost be quoted for your approval before the work is started.

Please inform us within 3 days if you don't want us to investigate, repair and test your product and want shipment to be returned.

Returning for repair:

Our goal is to ensure that you have a working product as quickly as possible. Often issues can be resolved without having to return the product. (for example, with updated software or firmware).

If the product needs to be sent back to JVL, please provide an accurate description of the problem.

When we receive the product we will perform a series of standard tests. Depending on the type of error we will recommend whether to repair, replace or upgrade.

If we do not find an error, the standard fee for investigation and testing will be charged and the product returned with its test report. Please consult with us to find the true cause of the problem.

Returning for repair when under warranty:

If the product is within its warranty period, you may return a product for repair or replacement. You are responsible for shipping costs to JVL. JVL will pay normal economy shipping cost when we ship back to you.

Returning for repair outside warranty:

If you are outside of your warranty period, you may return your product for repair. A fee will be charged for investigation and testing.

You are responsible for shipping costs to JVL.

Time budget:

Please allow 2 weeks for results from investigation and testing. We use specialized technicians for investigation and testing. Some tests take 24 hours or more.

Depending on error and type of repair, final tests are often required to ensure a perfectly working product.

Take note that for older product range special components may be needed. This will increase the time for a repair.

Please allow 2 weeks for outside warranty repair from when we have received a valid purchase order number. If you need fast repair please always send a purchase order number along with the shipment.

Break down / Urgent repair:

We understand the seriousness of a production breakdown. We offer several solutions to get you up and running again as quickly as possible.

- Front of the line express repair. The fee for this service can vary depending on if you want us to work overtime, in the weekend etc. Please contact us.
- Product swap. Consider swapping your product with a refurbished product at a fixed cost. Please contact us to check availability.
- Delivery from local stock in your area. Your local distributor or neighbor may have the exact same motor on stock. Handling fee and express delivery charges will apply.
- The option to swap or replace with a new product is not covered by your original products warranty. You should still send the faulty product for repair. Once repaired, you will then have a spare on stock if any problem should arise in the future.

Returning for Refund or exchange:

If you are within 14 days of purchase you may return your product for a refund, minus a 30% restocking fee. An RMA number is still required. You are responsible for shipping costs to JVL.

Returns and exchanges have certain restrictions:

- Only standard stocked products may be returned.
- Product must be unused and returned in its original packing.
- No signs of wear or mounting is accepted.

The following Products may not be returned or exchanged:

- Made to order products
- Customized products
- Non stocked products from 3. party suppliers.

Status enquiry

We will update you with our progress during the repair process. During the process you may still want more information.

Please send inquiries about repair status to rma@jvl.dk with the RMA number in the subject line.

Warranty

The warranty period is one year for our products and 3 months on repaired parts.

Best regards
Mads Vernon Jørgensen
