

New Modules for Integrated AC Servo Motor

JVL Industri Elektronik A/S, a Danish company, announces two new expansion modules for their Integrated AC Servo motor released here August the 4th. A Profibus-DP module and a NanoPLC module.

The Profibus-DP module offers:

- Control and setup through 12Mbit/s Profibus-DP
- Logic I/O's for high speed start/stop. In position indication and Home switch
- LED's to indicate status (D-Sub connector module only)
- RS232/RS485 interface.

The NanoPLC module offers:

- Standalone operation with sequential program execution
- 8/4 Opto isolated In/Out. 5-30VDC
- Outputs up to 200 mA
- LED's to indicate output status, home and power status (D-Sub connector module only)
- RS232/RS485 interface.

Both modules can be delivered either with integrated cables with watertight connections for use in harsh environments, or be delivered with D-Sub connectors.

The modular built-up of the JVL Integrated MAC motor makes it extremely versatile for very many applications. The Profibus-DP and NanoPLC modules are just two of more modules available
