

# Press Release

## **MAC800 drawings now available in 3D for CAD** 2d and 3D drawings can now be downloaded from [www.jvl.dk](http://www.jvl.dk)

In our continued efforts to support customer requirements, we have now made 2D and 3D drawings of the popular MAC 800 integrated servo motors available for download from our website, [www.jvl.dk](http://www.jvl.dk). Drawings are available for both the MAC800-D1 (motor without brake) and MAC800-D4 (motor with brake).

The drawings are available in the following formats: DXF, IGES and STEP, to suit most customers' needs. All drawings are dimensionally correct and to scale.

This new service will be followed up by drawings of other items in the MAC range of integrated motors and will greatly simplify and speed up the construction process for our customers.

For further information, contact: JVL Industri Elektronik A/S, Blokken 42, 3460 Birkerød, Denmark, tel. +45 45 82 44 40. E-mail: [jvl@jvl.dk](mailto:jvl@jvl.dk)
