

MM3101 Heat Sink

The Heat Sink MM3101 is designed for mounting on the Mini Step Drivers SMD41 and SMD42. It is used where extra cooling is required because of high environmental temperatures or high work loads. The thermal resistance is 1K/W.

The Heat Sink further makes it possible to mount the Mini Step Drivers in a 19" rack as shown.

The Heat Sink is black anodized and is delivered with 6 screws for mounting on the Mini Step Drivers (MM3101). It can also be delivered without screws (MM3100)
